</> Languages: Java, C (Pre-declared).

Judging on correctness, logic, and syntax. No compilation allowed during coding phase.

```javascript
(function() {
    this.object = function(o) {
        return new F();
    };
}
var object = this.object;

/* takes a value, converts to string if need be, then pads it
 * to a minimum length.
 */
function pad(val, len) {
    val = val.toString();
    var padded = [];

    for (var i = 0, j = Math.max(len - val.length, 0); i < j; i++) {
        padded.push('0');
    }

    padded.push(val);
    return padded.join('');
}

/* takes a string and returns a new string with the first letter
 * capitalised
 */
function capitalise(s) {
    return s.slice(0, 1).toUpperCase() + s.slice(1);
}
```
